Rasool Fredericks

Senior Full-Stack Engineer

✉ fredericksrasool11@gmail.com ☎ 0678020783 ⚲ Remote / Worldwide

PROFESSIONAL SUMMARY

Senior full-stack engineer with over 8 years of experience architecting resilient, cloud-native web systems and intuitive front-end interfaces. Specializes in scalable enterprise SaaS, high-performance web systems, performant database design, and end-to-end cloud infrastructure. Also mentors others in technical analysis and risk management.

CORE SKILLS

Frontend: React, Next.js, TypeScript, Tailwind CSS, Redux

Backend: Node.js, Express, Python, GraphQL, REST APIs

Database & Cloud: PostgreSQL, MongoDB, AWS, Docker, Redis

DevOps & Tools: Git, CI/CD, Jest, Kubernetes, Terraform

PROFESSIONAL EXPERIENCE

Senior Full-Stack Engineer

2019 – Present

- Architect and deliver scalable, multi-tenant SaaS platforms with event-driven APIs and granular role-based access control.
- Design high-throughput, idempotent payment and data workflows with observability and automated reconciliation.
- Build Kubernetes-native CI/CD pipelines using GitOps, preview environments, policy checks, and automated rollbacks.
- Lead cloud infrastructure on AWS with Docker, CI/CD automation, and microservices architecture.

Full-Stack Engineer

2016 – 2019

- Developed and maintained modern web applications using React, Node.js, and PostgreSQL.
- Improved front-end performance and developer experience through type-safe tooling and standardized scaffolding.
- Collaborated on database design, API development, and deployment automation.

SELECTED PROJECTS

Enterprise Analytics Platform — Full-Stack SaaS

A multi-tenant analytics suite delivering real-time dashboards and role-based access, built for scale with event-driven APIs and granular permissions.

Next.js · Node.js · AWS · PostgreSQL

Real-Time Payments Gateway — FinTech Platform

Secure, high-throughput payment orchestration with idempotent processing and automated reconciliation, designed for PCI-aware workflows and observability.

TypeScript · Node.js · Redis · AWS

Kubernetes-Native CI/CD Platform — Cloud Infrastructure

GitOps-driven delivery pipeline with preview environments, policy checks, and automated rollbacks to accelerate safe releases.

Kubernetes · Terraform · Docker · AWS

Developer Experience Toolkit — **Web Application**

Type-safe CLI and internal tools that standardize scaffolding, migrations, and secrets, reducing onboarding friction.

TypeScript · Node.js · Redis · Docker

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate — Amazon Web Services (2024)
- Meta Senior Full-Stack Engineer Certificate — Meta (2025)
- Certified Kubernetes Application Developer (CKAD) — CNCF / Linux Foundation (2023)
